

SQUIRREL

Wheel Safety Device

The Squirrel prevents potential wheel loss from loose nuts.

- ✓ 10 stud version for 22.5" wheels
- ✓ Easily fitted, 1 piece/1 minute fit
- ✓ Lightweight, unaffected by impact
- ✓ Resistant to temperature extremes, paint, and most chemicals
- ✓ No special tools required
- ✓ For use on rims with 24-33 mm nuts
- ✓ Peace of mind for drivers, cost effective for operators
- ✓ 5 year life expectancy, reusable

SQUIRREL

Wheel Safety Device

What our Customers Are Saying About the Squirrel:

“The Squirrels stay on the wheel and the lug nuts do not come loose. They are easier than other brands when you have 8 or 10 of them to mess around with.” - Daren, Colorado

“We are very satisfied with the Squirrels. Everything is going good.” - Chris, Oklahoma

Routine Torque Checking: Simply move the Squirrel sideways using a screwdriver or remove completely and torque in the normal way; then, refit.
